Villa in the Überetsch area

Aluminium window wall in a single-family house

Lots of glass, narrow frames: this was the owners' wish for their new windows. They also wanted a direct connection between the interior and the spacious garden. Their choice fell on the FIN-Vista window wall with its integrated lift-and-slide doors. Its modular system permits the simple installation of large areas of glass. The slender frames ensure maximum light incidence and views to the outside. The modern aluminium design perfectly matches the house, while the PVC core ensures excellent insulation.

Type of building	Single-family dwelling
Project	New build/conversion
Country	Italy
Region	South Tyrol
Locality	Überetsch
