Villa near Utrecht

FIN-Project, FIN-Vista, FIN-Slide – a trio that brings light into living areas!

This modern single-family house in the Dutch province of Utrecht thrives on its straight lines and the carefree elegance of its mirror-clear glass façade. The architectural goal was to open up the house to the natural world and permit as much natural light as possible to flow into the interior: this aim was achieved via the numerous large window areas and glass sliding doors.

The front of the house, which lends it its character, is a combination of FIN-Vista and FIN-Project windows, as well as FIN-Slide lift-and-slide doors that can be individually adapted thanks to their modular functionality and can be seamlessly joined together. The slender window frames, made of aluminium both on the outside and inside, give the façade its elegant structural lines. The uPVC core keeps cold out and heat in – the insulation provided by the large windows lets in nature, but not the outside climate.

Type of building	Single-family house
Construction	2017
Project	New build/conversion
Planning	Theo Verburg Architecten

Products used

U_w - Heat transmittance coefficient of window element

R_w - Sound insulation properties of a window

npd - No performance determined

FIN-Vista

aluminium-aluminium

Modular mullion-transom system for window walls. Can be combined with all windows, sliding and folding doors.

U_w 1-sash 2-/3-glazing: 1,3 / 0,81 W/m²K

R_w Standard: 34 (-2;-6) db

R_w Best value: 44 (-2;-6) db

FIN-Project Nova-line 78/88

aluminium-aluminium

U_w 1-sash 2-/3-glazing: 1,2 / 0,82 W/m²K

U_w 2-sash 2-/3-glazing: 1,2 / 0,94 W/m²K

R_w Standard: 38 (-2;-6) db

R_w Best value: 45 (-1;-4) db
