Hotel BN Suites Rambla in Alicante

Fin-72 and FIN-Slide: quiet rooms in the city centre.

This fully renovated apartment hotel is located in the heart of the vibrant city centre of Alicante on Spain's Costa Blanca. Seven apartments are distributed over seven floors, each with two double rooms, a kitchen and a balcony. The frame material chosen is white extra-smooth PVC, offering minimal maintenance and aesthetic harmony both inside and outside.

The central requirement for this project was effective noise protection. The solution: FIN-72 windows and FIN-Slide lift-and-slide doors. Co-extruded seals, air-tight in the corners, all with a uniform contact pressure; asymmetrically arranged glazing; and high-quality fittings with low spacing between locks all optimise sound insulation and ensure maximum tightness. The use of laminated safety glass has further increased the sound insulation effect. The result is quiet, bright rooms for the perfect holiday.

Type of building	Hotel/Catering
Construction	2019
