## Wooden house in the South of France

Rustic and modern style with FIN-Project, -Slide and -Door.

The warm wooden façade and jet black aluminium frames give this passive house a simple, modern and rustic style. This mix is continued on the interior by the aluminium frames in the same colour and the wooden cladding. While there are smaller windows on the north side, the building opens up to the sun on the south-east side with lift-and-slide doors, almost breathing nature.

Venetian blinds in the Twin composite sash and external blinds offer individual protection both from the sun and from prying eyes. The triple glazing of the Sun-Block 3 solar control glass offers reliable protection against heat and is ideal for the large glass surfaces on the south-east side. FIN-Project windows and FIN-Slide lift-and-slide doors were chosen for their perfect tightness. Both systems offer optimal insulation values thanks to the PVC in the core. The home is secured by a FIN-Door entry door of aluminium that complements the modern touch in the wooden façade.
