New build near Barcelona

PVC and aluminium: a dance of the surfaces.

The Lego-like shapes of the façade alternate between a rural wood aesthetic and urban grey and white tones. It is as if the PVC window frames in their oak wood decor are asking the aluminium frames in Sablé Anthracite to dance! The homely wood tone of one window contrasts with the elegant grey of the other. In this way, the individual parts of the vibrant façade of this single-family house maintain their own personal style, yet remain dynamically linked to one another. The uniform wood decor surface of the windows creates an inviting, cosy atmosphere on the interior.

The narrow Nova-line design line permits maximum light incidence while gently framing the hilly landscape. The triple glazing of the windows guarantees excellent thermal insulation with almost no loss of brightness. The push-button handles ensure safety and ease of use: unsupervised children cannot open the window from the inside.
