

FIN-Project Nova-line 78/95
aluminium-wood

Single-family house in El Ejido

Slim frames and wood – elegance and security in one.

The elegant aluminium frames, covered on the outside by glass, reduce the external outline to a minimum. The real wood inside gives the slender frames a homely touch. Thanks to its cosy, natural aesthetics, the material harmonises discreetly with the furnishings and is perfectly colour-coordinated with the wood tones of the interior. The PVC core ensures that the wood veneer does not come into contact with the drip edge. This makes the material particularly durable.

The large glass surfaces of the lift-and-slide doors and windows allow maximum light incidence that can be individually regulated by the exterior blinds. The windows with their pre-assembled exterior blind boxes were installed with the innovative FIN-Fix installation frame. This protected the products from damage and dirt during construction, allowing them to display their elegant, cosy charm to the full following installation.
