

FIN-Window Nova-line 77+8
aluminium-PVC

San Pietro Clinic in Bergamo

Window replacement during the pandemic.

Replacement of 550 windows, in a hospital – all while it continued to function. The project itself was already complex and organisationally demanding. In addition, the windows had special aesthetic and functional requirements, with difficulties of installation in eight parts of the building that were to be renovated, not to mention in a newly built wing. The biggest challenge was the outbreak of the coronavirus pandemic in 2020.

Finstral's slide-in installation was clearly the key to the project's success. In this minimally invasive method, the old surrounding frame with its functioning structural joint is retained, with only the sash frame and the fittings removed. The existing surrounding frame is duplicated with a profile inserted from the inside that replaces the frame of the old sash. So, even in the entirely exceptional circumstances of COVID, replacement always proceeded smoothly, thanks also to the professionalism and expertise of the Finstral team.

Type of building	Public building
Construction	2021
Project Planning	Window replacement Glauco von Wunster

Country	Italy
Region	Lombardy
Locality	Bergamo
Photographer	Hannes Meraner

Products used

U_w - Heat transmittance coefficient of window element

R_w - Sound insulation properties of a window

npd - No performance determined

FIN-Window Nova-line 77+8

aluminium-PVC

U_w 1-sash 2-/3-glazing:

1,2 / 0,78 W/m²K

U_w 2-sash 2-/3-glazing:

1,2 / 0,89 W/m²K

R_w Standard:

36 (-2;-5) db

R_w Best value:

45 (-1;-3) db

FIN-Vista

aluminium-aluminium

Modular mullion-transom system for window walls. Can be combined with all windows, sliding and folding doors.

U_w 1-sash 2-/3-glazing:

1,3 / 0,81 W/m²K

R_w Standard:

34 (-2;-6) db

R_w Best value:

44 (-2;-6) db
